View live videos online at www.peltonsimangus.com

158 BULLS AND 110 FEMALES

*Wait on the Lord: be of good courage, and he shall strengthen thine heart. Psalms 27:14
Come unto me, all ye that labour and are heavy laden, and I will give you rest.
We take comfort in these scriptures as we start each new day.*

MISSION STATEMENT

To produce beef that will be genetically profitable for our customers
and enhance a desirable eating experience for consumers.

The Future Plans of Pelton Simmental/Red Angus

2029 370th Ave. • Burdett, KS 67523 • 620-285-9934 cell • 620-525-6632 • www.peltonsimangus.com

Dear Friends,

On behalf of Pelton Simmental/SimAngus/ Red Angus, my bother, Gary, and I, along with our families and cooperators, welcome you to our 23rd Production Sale.

In our catalog last year, I mentioned that every family operation has to face the reality of generational transitions at some time. This year starts that transition as Gary and I are stepping back and allowing our sons and their families to proceed with energized motivation in breeding and marketing our Red Angus, SimAngus and Simmental genetics.

Gary, Donna, Sue and I want to experience a more relaxed schedule by letting the next generation manage the crops and cattle. We are so blessed to have children who want, and have come back, to the ranch and farm to take this operation to the next level. With all the technology and opportunities available, we look forward to the progression in the next several years that they will make.

As I think back on the past 44 years of seed stock production, I recollect so many memories. Making so many friends and having the opportunity to help build breeding programs, has been so satisfying. Hard work, adverse weather conditions, calving seasons, catalog preparations, sale preparations, AI and ET seasonal breeding certainly can play a toll but patience and belief in what we were doing, along with our Christian faith, allowed our family to enjoy the ride together.

As we transition to the next generation, our children are thankful to have had many different opportunities to consider for their registered cattle. They want to continue to take care of our friends who use our genetics. Therefore, after much consideration, they have chose to keep their entire registered cowherd here at the ranch and continue raising top quality registered red SimAngus and Red Angus genetics. However, they have chosen to outsource the development and marketing of their bulls in the future to the R. A. Brown Ranch in Throckmorton, Texas. Starting next year, they will be selling bulls with the Brown family as part of their Cooperator Team. Dustin, Kendra, Aaron and Kelly are very excited about this opportunity and are looking forward to developing new, and renewing old, friendships.

In the past years, we've spent a lot of time working with crossing Red Angus and Simmental genetics and continue to see exciting results. Our two-breed operation offers our customers flexibility and diversity from the 1/2, 3/4, 7/8 and purebred bulls and females. It has been fun and satisfying working with many of you developing different breeding programs that are successful operations. Again this year, we are offering an excellent set of heifers, both fall bred and open spring to be used in commercial and purebred programs.

The ultrasound data for the Simmental, SimAngus, and Red Angus bulls will have adj. ribeye area and % IMF (marbling) figures available. We will rank the bulls for marbling by ratio's within the herd for both the spring and fall bulls. You can't fairly compare the spring and fall programs because of feed and weather differences so we will make only contemporary group comparisons. These figures will be worth studying and can be used to sort through the bulls and see differences in marbling and ribeye area, which can be valuable information for selection priorities.

Carcass information is a top priority for our breeding program, and we have gradually increased our quality grade and contribute it to use of carcass quality sires and identifying dams with carcass merit for use in our embryo transplant program. The beef industry is headed more and more toward making us all accountable for our products, and we are confident that the genetics and pedigrees in this offering will take you to that next step whether you market through an alliance or local markets.

Again this year, we will sell all lots in catalog order beginning with Lot 1. We will have sire groups together making it easier for you to compare, since many will be ET and AI calves.

I can not thank my Lord, family, cooperators, customers and friends enough for the continued support of what we started here in 1972. We look forward to seeing you at this year's sale and are very excited about the genetics being offered as we transition to the new managers, our beloved children, Dustin and Kendra and Aaron and Kelly.

The Peltons

Sincerely,

Lynn Pelton

TRUCKING

We will assist buyers in making the most economical transportation arrangements for bulls and females. We recommend insuring your purchases as transportation is at buyer's risk.

VET WORK

Dennis Huck DVM, Coldwater, Kansas, and Darin Huck DVM, Dodge City, Kansas, performed the semen testing and health work on these cattle. They are highly qualified and you can have confidence in the vet work done and that it is accurate. They will be available sale day to answer any questions and issue health papers.

HEALTH

Health papers will be furnished with each lot.

MEASUREMENTS

Scrotal — measured in centimeters and adjusted to 365 days of age.
Frame — hip heights have been adjusted to 365 days of age and converted to a frame score.
Example: 5 - (5.0-5.4) 5 (5.5) 5+ (5.6-5.9)

CARE AND DEVELOPMENT OF YEARLING BULLS

It is very important to remember these animals are young and need to grow and develop while they are working hard for you this year. We recommend that keeping these bulls on a good nutrition before, during, and after the breeding season. We have used yearling bulls for many years and can be of assistance if you have questions.

RED ANGUS CATEGORIES AND PERCENTAGE

- 1A** — Considered the same as Fullblood. 100% Red Angus with no disqualifying characteristics.
- 1B** — From 87% to and including less than 100% Red Angus blood content, no disqualifying features..
- II** — Equal to or greater than 87%, up to and including 100% Red Angus, blood content having one or more disqualifying characteristics.
- III** — Less than 87% Red Angus blood content.

HIGH TECH BEEF

Michael Lindell

(785) 293-5282

The evaluation of cattle for carcass merit by use of ultrasound has become a phenomenal tool for cattle producers. Carcass traits are highly heritable, and producers have shown that they can make rapid improvements to their calf crop by knowing where their cattle stand in terms of ribeye area, marbling and fat thickness. Ultrasound allows us to evaluate live cattle rather than having to wait until cattle are harvested, accelerating change in generations by years.

Ultrasound data is collected at approximately one year of age. The cattle are weighed and measurements are taken to evaluate the fat thickness between the 12th and 13th rib, the size of the ribeye, and an estimation of the marbling in the ribeye. These measurements correspond to those used to determine the value of a harvested animal's carcass. Just like recording weaning and yearling weights, the cattle are evaluated within their contemporary group and adjusted to a year

of age. This information is then used to determine EPDs for each animal, along with data submitted on their ancestors and progeny.

When a harvested animal is evaluated for carcass quality, they are given a yield grade and a quality grade. The yield grade is based on an equation encompassing fat thickness; hot carcass weight; kidney, pelvic and heart fat; and ribeye area. The fat thickness measurement taken by ultrasound between the 12th and 13th rib is the same as the measurement taken on a carcass for yield grade evaluation.

Ribeye area is also used to determine yield grade. It is used to indicate percent muscle. The industry rule of thumb is that the average animal would have 1 square inch of ribeye area for every 100 pounds of body weight.

Marbling is the final measurement taken, which measures how much intramuscular fat is present in an animal's ribeye. In carcass evaluation, quality grading is based on marbling and maturity, with marbling being the primary determination of quality grade. The ultrasound measurement of marbling is given as percent fat. Conversion of percent fat to quality grade is as follows:

Percent Intramuscular Fat	Quality Grade	Marbling Score
2.3-3.9	Select	4.0 – 4.9
4.0 – 9.7	Choice	5.0 – 7.9
9.9 – 12.3+	Prime	8.0 – 9.0+

The Pelton family is a prime example of how using ultrasound as a selection tool within your herd can reap results. They have five prestigious Grid-Master Awards to show it.

Our Valued Cooperators

Greetings from the crew here at **D CROSS GENETICS**. This is the 8th year that we have been blessed to offer our Red Angus Genetics in this great sale. It is bittersweet to write this letter knowing that this will be the last sale of its kind. God had a plan to bring the Peltons and us together in 2009 and He has a plan for the future for each of our operations. Words can't express the appreciation we have for the Pelton Family and the long term relationships that have been developed because of the mutual Love of the Lord and Red Angus cattle.

Lynn has inspired us over the years with his abilities in genetic selection and breeding. Although those 2 things are important, we admire him most for his integrity and character that allows him to offer customer service that is second to none.

It is **D CROSS GENETICS'** plan to continue to offer the highest quality Red Angus genetics in 2017 and beyond by either private treaty or auction sales. We are seeking God's will and guidance in this endeavor so watch for future advertising information. Call Ed (785-541-0248) or Jen (785-541-0545) anytime.

Congratulations to the Peltons for a very successful 23 years and thank you for allowing us to be a part of this sale for the past 8 years. It has been an honor and a blessing!

God Bless, The Durst Family

First of all we would like to say congratulations to the Pelton family on their progressive and very successful career in the seed stock industry, where many well deserved honors have come their way. We have felt honored and privileged to serve as one of their recipient herds and as a co-operator in their annual sale these past few years. We appreciate and thank the Pelton's for their integrity and dedication to the cattle industry and for giving us this opportunity to work with them.

ANDERSON LAND AND CATTLE, INC. is a family-owned and operated cow-calf and no-till farming operation located near Oberlin, Kansas. Artificial insemination has been used continually for forty years, using synchronization protocols on 50-60 heifers and 300 mature cows each year. A purebred Simmental herd was developed beginning in 1978, with Red Angus breeding introduced in the 1990's. Carcass data collection has been a top priority for us, and using those results over the years, we've been able to make breeding decisions that have allowed progressive improvements. 2004 data showed 0% prime and 73% choice carcasses to 2014's 18% prime and 98% choice and above.

All around herd performance is very important to us, from the maternal side to terminal feedlot steers. Through total herd analysis, we select bloodlines carefully to move us forward in our business. Raising quality cattle is one of our passions, and we've been developing our own ET program the last four years using dams that have risen to the top of our herd as donors. We plan to continue marketing bulls from these matings through private treaty at the farm and welcome you to give us a call in 2017.

Sincerely,

The ALC Crew Jason – 785-470-7440 Clay – 785-475-7183

Back from left to right: Austin, Ed, Larry, John and Wyatt.

Watch and Bid Online at DVAuction.com

CAN'T MAKE THE SALE?

We are pleased to bring you real-time Internet bidding and a live broadcast of this sale through DV Auction. To watch or bid online, simply complete the following steps:

- ★ Visit the DVAuction web site at www.dvauction.com
- ★ Click on the "Register" tab
- ★ Enter a user name, password and your contact information.
- ★ Click on "Apply for Bidding."
 - Select the sale from the list of other auctions and click "Apply".
 - Complete the process by filling out the Banking and Lending information requested.
 - Be sure to include a personal contact at your bank, we will contact them in order to get a credit reference.
 - If you would prefer to be approved using your credit card, call (402) 316-5460
 - Please be sure to apply for bidding at least a day in advance of the sale-every effort will be made to process your application in a timely manner.

DVAuction will contact you once you have been approved to bid. We do not provide buyer numbers until you have purchased a lot in the sale, and that number is only usable for that auction. After the sale contact the sale owner or manager to make arrangements for payment and delivery of your online purchases.

PLEASE NOTE: High speed Internet access (DSL, T-1, or Broadband) is required to be able to bid successfully during the sale. If you have any questions, please contact DVAuction at (402) 316-5460 or email support@dvauction.com.

PROXY BIDDING: If you can't access a computer during the sale, you can now place a "proxy bid" through DV Auction. Simply follow the instructions listed above, and as the sale date nears there will be a "Proxy Bidding" link under the sale listing on the main page of DV Auction. You can then place the maximum amount that you'd like to bid, and our system will represent your bid just as if you were there.

ATTENTION!

A large, black, five-pointed starburst graphic with the word "ATTENTION!" written in white, bold, sans-serif capital letters across its center.

Our Sixth DV Auction Sale

The bulls and females will be on display the day before the sale and also sale day, ready to pick up after the auction is over. The only difference will be the cattle will not be physically walking through the sale ring, but will be viewed on several large screens scattered around the ring. We feel the advantages outweigh the disadvantages. You will be able to see the animals move at a distance on video, giving you a better feel of their balance and profile. The reduction of stress and injury risk on both cattle and people is another factor we considered. Our load out process will be simplified and quicker, along with getting the sale over faster by not having to sort cattle outside the sale ring. You will be able to view every lot on our website days before the sale.

The only disadvantage that we can see is that the cattle are going to look better on sale day, in person, than what they will appear to be on video because of 6 more weeks of maturity. Having to clip and video so early to get everything completed and in the catalog is the reasoning for why we consider it a slight disadvantage. However, we ask for your patience as we think you will like the process we are pursuing. We want this to work for everyone. We value your opinions, your patience, and your business.

Hope to see you on March 23.

All bulls are PI-BVD tested negative and are pedigree free or have been tested free for OS.

ATTENTION!

A black oval graphic with the word "ATTENTION!" written in white, bold, sans-serif capital letters across its center.

In case of sale cancellation, because of adverse weather, go to our website at www.peltonsimangus.com for updates.

You will be able to view live video of sale lots on our Website at www.peltonsimangus.com after the first week of March.

FEEDING OF BULLS

Cattle raised on the Pelton farm are not pampered or overfed, but they are also not shorted on nutrients that contribute to proper development of structure, capacity and reproductive performance.

The cow herd runs seasonally as a commercial herd would on range, stalks or dry lot forages with access to a high quality Vigortone mineral supplement and additional protein or energy as the season requires. Heifers are grown with frame, capacity and future fertility and milking ability in mind.

Bulls are developed with two goals:

1. Allow the bull to express his natural ability for gain and carcass quality; demonstrating a good weight per day of age.
2. Produce a bull capable of going to a new home under commercial conditions that will be able to travel and breed cows.

Bull rations are low in starch and high in digestible fibers, producing good gains without the health and over conditioning problems associated with high corn, feedlot type rations. A custom Vigortone pellet provides vitamins, minerals and Rumensin on a soy hull based carrier while wet distillers grains add protein and energy to the mix without extra starch. A small amount of corn silage and mixed hay make up the rest of the diet producing a medium energy mix that builds big, strong, high capacity, high fertility bulls that don't crash when put out in the breeding pasture.

John Marks
Nutrition Specialist – Vigortone Ag Products

MEANING OF \$ INDEXES FOR SIM ANGUS & SIMMENTAL

Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$indexes blend EPDs and economics to estimate an animal's overall impact on your bottom line. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

All-Purpose Index (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

Terminal Index (TI): Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield.

Using API and TI: *First, determine which index to use; if you're keeping replacements use API, if not, TI.* Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years ($\$50 \text{ diff.} \times 30 \text{ hd.} \times 4 \text{ yr.} = \$6,000$). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed.

FOR PERCENTILE RANKINGS OR MORE DETAILED INFORMATION ABOUT EPDS AND \$ INDEXES VISIT WWW.SIMMENTAL.ORG.

Understanding the Percentile Ranks of the 2016 Sale Offering

It is a great time to be in the cattle business even though we are being affected by various weather patterns. We know that rain will come and it appears beef prices will remain strong due to lower cattle inventory.

A major change has occurred as the Red Angus and Simmental Associations have joined forces to create the first true multi-breed sire evaluation. Over the past several years we have published Red Angus EPDs and SM EPDs in our sale catalog. For years, many of our customers have wanted to compare the EPDs of our sale bulls across breeds. That wish has become reality; the growth and carcass EPDs (BW, WW, YW, Milk, Marbling, YG, CW, REA and Fat) of all animals in this years sale offering can be directly compared. Because Red Angus and Simmental EPDS are now presented on the same base, producers will no longer have to calculate adjustments as they move between breed or hybrids of both breeds.

To help buyers familiarize themselves with the new multi-breed EPD base, we have presented the following percentile rank tables. If you have been buying cattle in the top 25% of the population for certain traits, the percentile rank tables will help ensure you maintain the same level of performance. The percentile tables show how various levels of expected progeny performance compare within Red Angus, Simmental and SimAngus Hybrid populations. If you have any questions, please do not hesitate to call me at 620-525-6632.

**Please look through the entire offering
as we are excited about several Lots.
You will find individuals
in Fall Sim Angus, Fall Red Angus,
Yearling Sim Angus, and Yearling Red Angus
categories worthy of leading off our 2016 sale.
Thank you for having
an interest in our breeding program.**

FALL SIM ANGUS BULLS

NON-DILUTE RED: *A red bull that does NOT possess the dilution gene. He will sire black calves from homozygous black cows (Angus), black and red calves from heterozygous black cows (baldies, etc.) and red calves from red cows. Numerous Simmental and SimAngus are non-diluters indicated in the footnotes under the lot pedigree.*

Non-diluter. Lot 1 could well be the "Ultimate". This 1/4 Simmental has all the right pieces to complete about any puzzle — an intriguing pedigree; EPDs that place him among the best 10-20% of the breed for All Purpose and Terminal Index values, top 2% BW, top 3% Marb, and top 10% CE; and top notch ultrasound data. Brown Ultimate X7752 is a proven Red Angus sire widely used for calving ease and making productive, broody females. Donor dam, Kay, really out did herself on this flush as 4 full brothers sell as Lots 27-30 and full sisters sell in the fall bred offering.

Non-diluter. Lot 2 is a good example of why we like the Epic U368 progeny. They come easily and develop into thick made yet highly maternal cattle. This guy excels in calving ease, growth, maternal traits, and red meat quality and yield. Note his standout EPD percentile rankings and performance and ultrasound ratios.

Non-diluter. Lot 3 is a full brother to the next lot and they have earned the right to begin the Pinnacle sired group. Their high marks for marbling is no surprise as their donor dam scored big on her yearling IMF scan and currently stands with the best of the breed in the top 1% for Marb EPD. Both Pinnacle and Direct Ticket contribute to the calving ease and low birth weight predictions for this mating.

Non-diluter. Lot 5 is an ET calf whose dam is the Packer/Shear Force donor that produced the popular Red Angus-sired Lock n Load sons in 2014. He also possesses a nicely balanced EPD profile with all but a few ranking into at least the best 35% of the breed. Don't overlook this moderate birth weight 1/4 Simmental.

Lot 23 is only 1/8 Simmental and could be used for heifers. This pedigree is lined with Red Angus and Simmental calving ease and marbling genetics. You'll probably want to keep his heifer calves as replacements, but he could also improve the quality grade of a set of calves.

GENETIC RESOURCES

YOUR BUSINESS PARTNER...

Allied by reputation and focused on service has been our motto at Allied from the start. With that charge always in mind, Allied has come a long way in just a little over 5 years. The membership has grown, the staff and ability to provide services have grown and most importantly the reputation has grown across the beef industry. Successful and customer focused seedstock producing professionals are at the core of the Allied ownership and Allied's mission was and has been to offer value and profit enhancing services for that special group of experienced breeders and their commercial customers. You will make a great choice sourcing genetics from one of our owner herds. Now take the next step and contact Allied for options that make good sense for the future.

CLINT BERRY – Feeder Cattle Marketing Specialist and Superior Livestock Representative. Clint has built a team of committed marketing professionals prepared to offer value adding solutions across the US. Looking for a better way to market your calves in 2016, call Clint at 417-844-1009.

JARED WAREHAM – Marketing and Customer Services. Jared offers years of experience building and executing customer service priorities. Unique marketing solutions are his specialty at 660-492-2777.

GARRETT THOMAS – Sale Management Services. Sale preparation and execution for both commercial and seedstock sales are Garrett's specialty. Call Garrett for honest, profit proven sale services at 936-714-4591.

MARTY ROPP – Genetic Consulting and Seedstock Procurement. With nearly 20 years of experience in the SimGenetics and commercial genetics business you can count on real world options and solutions. Take the guess work and hassle out of bull selection and buying by giving Marty a call at 406-581-7835.

ANDREW CONLEY – Southern US Commercial Specialist. If you produce cattle south of the Mason Dixon Line and need experienced help with seedstock procurement and or commercial marketing, Andrew is your best resource. New to our team in 2016, his experience will make the difference at 706-781-8656.

FALL RED ANGUS BULLS

More On Selection Indices:

You will have noticed that we have added two new numbers in the catalog — HB (HerdBuilder) and GM (GridMaster). These are selection indices, developed to take several factors of economic importance into account and reflect those factors as a measure of profitability. In the development of indices, scenarios must be used. Below are the scenarios for HB and GB.

HerdBuilder Index

As the name indicates, implementation of the HerdBuilder Index will assist producers in building profitable herds. The HerdBuilder Index is built using the following production scenario:

- Red Angus bulls mated to cows and heifers
- Replacement heifers retained from within the herd
- All remaining progeny sold on a quality-based carcass grid

Factors included: EPDs of Stayability, Heifer Pregnancy, Calving Ease, Marbling, Yield Grade and Growth.

GridMaster Index

While Red Angus has traditionally been known as a superior maternal breed, those who have retained ownership in Red Angus calves know of their potential to excel in the feedyard and ultimately hang a premium carcass. The GridMaster Index is built using the following production scenario:

- Red Angus bulls mated to cows
- All progeny sold on a quality-based carcass grid.

Factors included: EPDs of Marbling, Yield Grade and Growth.

Lot 38 is a young herd sire that has a world of potential. He will grab your attention, not only with his EPDs (11 in top 30%), but also his ultrasound ratios of 130 IMF and 118 REA. It has been satisfying to watch how the Pelton Statement 225W progeny have measured up. They are typically wide, thick and deep with a pleasing appearance. They were the top selling sire group in 2015, with Lot 116 selling to purebred breeders, Flying H Genetics and D Cross Genetics. 6001Y, an Envy daughter, has been a great young donor with a MPPA of 103. Generations of predictability in this young herd sire.

Lot 39 will definitely catch your attention in person as well as on paper. His impeccable EPD profile, pedigree, and data add to his value. His sire, HXC Big Iron, is perhaps the most massive P707 son to date; while his Buffalo Creek bred dam is ideal in type and possesses a beautiful udder. We purchased her from Rhodes Red Angus in 2013. Her 2013 heifer calf is doing a super job as a first-time momma. Moderate birth weight, performance, marbling and maternal merit in this eye appealing herd sire with 7 EPD traits ranking in the upper 4-15%.

Lot 54's full brother shared the honor of leading the R397K sire group in 2015. Both brothers posted the highest weaning weights of the herd. 406B is an excellent prospect for the multi-dimensional rancher raising replacements and feeding the steer mates. Excellent performance, EPD profile, and cow family. Dam's 8 progeny had an average birth weight of 77.5# and ratios of 101 WW and 100 YW.

Lot 55 is closely related to Lot 54, as they are sired by R397K and out of Major League by Chateau dams. Maternal grand dams were donors. Miss Majority 806 ET has a progeny average birth weight of 74#. We have retained all 3 daughters; 2 are full sibs to 412B and the other is a future donor. Notice the 12 EPD calculations in the upper 1/2 of their class, including both index values. This genetic combination really works.

Lot 58 and his brother in the next lot are excellent candidates for the rancher needing a set of bulls to turn out with a large group of cows. These 18 month olds should get the job done and produce a lot of pounds at weaning and yearling. But wait, with genetic predictions like these, the calves should also do well at harvest time. Plus, I'd expect their heifer mates to make good momma cows.

Lot 59 posted an IMF ratio of 127. Not surprising as his maternal grand sire is one of the leading marbling sires of the Red Angus breed and his maternal grand dam is the mother of Pelton %IMF. Use these brothers to add some umph to your calf crop in terms of pounds to sell or carcass premiums.

Lot 60 looks to be a good choice for the cattleman that needs a bull to cover all the bases for his cow herd: Growth, fertility, longevity, maternal and carcass. His dam carries the LCOC prefix and is a youthful-looking 10 year old that still has an ideal udder and very good feet. 12 EPDs in the best 9%-39% and IMF ratio of 110.

Lot 61 leads off a nice Redemption sire group. He had the largest REA scan of the 1/2 brothers and IMF ultrasound ratio of 101. We like our Mimi cows and the dam to this bull is no exception. She is adequately feminine about her head and neck but squares up in her hip and carries herself on a bit more bone. Her MPPA is 103.6.

Lot 66 is a product of embryo transfer whose donor dam garnered a 105 MPPA on her natural calf. This guy has a ratio of 110 for both IMF and REA. Take note of his low birthweight, top 4% of the breed GM status, as well as top 12% for BW and MB and top 20% REA.

YEARLING SIM ANGUS BULLS

Lot 67: Pelton Lockload 94C

yearling SimAngus offering in style. They are backed by proven, breed-leading genetics. The calving ease, performance, maternal and carcass characteristics of Red Angus sire, Lock N Load U213, work well in our SimAngus program. The young donor dam really helps this flush stand out. She combines two of the most used Simmental sires, Shear Force and Dream On. Shear Force continues to stand at the top of the breed for CE, BW, MCE, Mk, Stay, Doc, YG, MB, REA, API and TI. 94C weaned at over 700# and garnered ultrasound ratios of 131 IMF and 103 REA.

(1/2 RA 1/2 Simm.) Non-diluter. A big growth bull (104 ww ratio, 103 yw ratio) out of the very popular Redemption, Red Angus bull. With CE and BW EPD's in the top 20%, his calves should be born easily with powerhouse growth potential. His dam is of Pelton breeding, consistently raising exceptional calves.

Lot 123 leads the yearling Red Angus offering. Here is your chance to obtain outcross genetics from sire, Andras New Direction, who is a culmination of some of the Black Angus breed's best. What makes this New Direction son unique from others selling throughout the country, is the Buf Crk Pineta 080 cow family. She maintains a top 1% status for HB, CE, BW and Stay, while sporting a top 7% GM and top 5% MB EPD. She was the dam of the popular Redemption and Epic R397K sons and daughters in 2015, and in 2014 her Halfmann Hustler R588 progeny demanded top dollar. Notice the phenomenal EPD profile and %IMF in this Red Angus Herd sire.

Lot 124 is a culmination of some of the breed's best calving ease, maternal, and carcass genetics. He possesses top 9% CE and BW, while still maintaining breed average EPDs for performance along with awesome carcass EPDs. In fact, he's pretty impressive clear across the board and has the data to back it up. His dam is a maternal sister to the Statement 225W son that topped last year's sale.

Lot 141 and the next lot are genetic gems and if you study pedigrees you'll realize they have an ancestry of breed leading genetics for making awesome momma cows. Maternal grand dam has been a prolific donor whose progeny always have excellent ultrasound data. Top of breed for both Index values as well as WW, YW, HPG, Stay, MB, CW and REA.

Lot 194 and the next three heifers are full sisters to the Andras Fusion sired yearling bulls in Lots 126-128. Fusion brings some prominent Black Angus bloodlines to the Red Angus breed and he is gaining in popularity for his calving ease, maternal and marbling potential. The EPDs are excellent for CE, BW, Milk, CEM, Marb, and GM. Phenomenal IMF in this heifer. Deep ribbed and stout.

Our Primary Objective Is Satisfied Customers

Terms and Conditions of Sale

TERMS

Terms of sale are cash.

INSURANCE OF PURCHASES AND RISK

Each animal becomes the property of and therefore is also the risk of the purchaser as soon as it is sold; except it shall be the obligation of the seller to see that animals are fed and cared for free of charge to the purchaser, until loaded for shipment or until the expiration of twenty-four hours after the sale, whichever occurs sooner. **INSURANCE WILL BE AVAILABLE AT SETTLEMENT AND MUST BE PURCHASED IF ANIMALS ARE DELIVERED AT A LATER DATE BY SELLER.**

BIDDING

All animals sell to the highest bidder. Any disputes or challenges regarding bids will be settled by the auctioneer and his decision will be final.

HEALTH

Health certificates will be furnished for each lot.

Bulls and females have been given IBR, BVD, PI3, BRSV, 7-Way Blackleg, Pasteurella, and treated with Iomec.

BREEDERS GUARANTEE

BULLS are PI-BVD tested negative and are fertility checked and guaranteed breeders.

FEMALES — Females represented as being “safe in calf” will have been examined and declared safe. They are considered breeders without further guarantee.

All females with the above exceptions are guaranteed to be breeders. If at the end of ninety days, after proper exposure, the purchaser is unable to get a female settled after first notifying the seller in writing, he may return the

animal, with current health papers, at the owner's expense to the seller. The seller, at his option, may replace the female with one of equal quality, refund the purchase price, or he may elect to prove her a breeder. He has ninety days to do so, but must use a registered bull. If he fails to get her settled, replacement of refund becomes mandatory.

No guarantee is given that a pregnant female will deliver live calves or that she will carry the calves full time nor that the calf will not be mummified. In no event shall the seller be responsible for damage caused from foreign bodies after the animal has been sold and for sickness not apparent at sale time.

REGISTRATION AND TRANSFERS

All animals have registration papers, unless otherwise stated in this catalog, and these will be sent to Association offices for transfers.

ANNOUNCEMENTS

Announcements from the Auction block take precedence over the information printed in this catalog.

RIGHTS AND OBLIGATIONS

The above terms and conditions of sale shall constitute a contract between the buyer and seller of each animal and shall be equally binding on both. Animals resold following purchase in this sale shall constitute a separate transaction and the rights and obligations of the parties connected there to are not covered by the above terms and conditions of this sale. Neither the owners, auctioneers, nor any other person connected with the management or conduct of this sale assumes any liability, legal or otherwise, except as set forth.

Our seedstock business is a genetic improvement business, and we take that very seriously for our customers. In order for our entire program to function properly, many different sources have to be actively involved. Sometimes we get so busy we forget to recognize those people. We say **THANK YOU** to:

- Dr. Kirk Gray and staff at Cross Country Genetics North for embryo transfer services.
- American Simmental Association staff and American Red Angus Association staff for the last minute updates and registration certificates needed for catalog completion.
- Our cooperators for their help preparing cattle for sale day.
- The semen distributing companies making the top genetics available for AI sire selection.
- Frank Seidel and staff (LaCrosse Livestock) for providing us with an excellent sale facility.
- To Ben, our wonderful son-in-law, who constructed and updates our Website for our customers and families.
- Lori Daniel (our catalog specialist) for her hours of hard work putting together a personalized catalog for our valued customers.
- Our fellow seedstock breeders and friends who have provided us with information and technology enabling us to make that next progressive step for beef improvement.
- Dr. Dennis Huck and Dr. Darin Huck (our veterinarians) and Dennis' wife, Shirley, for gathering sale day information plus health paper requirements.
- To Kendra, my daughter-in-law, for all the registration computer work.
- Mike Lindell for his ultrasound expertise.
- Our valued customers for your continued support and belief in our breeding program.
- To my family members for being patient and understanding during deadline periods such as catalog preparation, sale preparation, calving season, AI and ET season and for their **LABOR, LABOR, LABOR!!!**
- To our Lord and Savior for allowing us to be his servants and stewards of just a small portion of this business we call **BEEF SEEDSTOCK PRODUCTION**.
